Poznań, day 16.06.2016r.

Reference letter

It is to confirm, that GT Projekt, Geotechnical Consultants, the company based in Swadzim, 4th Parkowa street, has been involved in numerous military projects lead by Skanska. The GT Projekt team of geologists, geotechnicians, and structural engineers was engaged in military airports projects in Powidz and in Poznań - Krzesiny, and others.

The scope of GT Projekt services has covered the following activities:

- geotechnical field investigations and laboratory analysis;
- geological and geotechnical documentations, prepared in accordance to Polish Standards and Eurocode Standard;
- geotechnical and structural design, including piling design and concrete structures;
- geotechnical supervision of earthworks and foundation works;
- geotechnical reporting.

All the services have been provided by GT Projekt on time, in a flexible manner and in the highest quality.

Based upon a long-term cooperation with the management and the engineering staff of GT Projekt, the company can be recommended as a reliable partner.

Yours sincerely

Skanska S.A.
Dyrektor Zespołu Projektów

Paweł Haberland
