

To whom it may concern

## Reference letter

GT Projekt assisted us as subconsultant for a number of different projects during 2012 and 2013. The most substantial being the geotechnical field investigations for

- The Stockholm Bypass tunnels
- CityLink cable tunnel
- Lidingö Light rail
- Pelle Project windmill farm

In addition to the above numerous others.

The works entailed typically the execution of the fieldwork and to varying extent the geotechnical analysis and reporting, depending on the individual project setup.

The works were carried out by GT Projekt with a high degree of quality and in a flexible manner to ensure a timely and cost-efficient solution.

I am pleased to recommend them for similar works.

Yours sincerely,

Johan Guthe  
Business Unit Manager – Geotechnical Engineering
